REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the art of record (considered as a whole) neither anticipates nor renders obvious the method of cutting a rare-earth alloy with a wire wherein the thickness deviation percentage of a resin layer with respect to the wire is about 40% and the average height of abrasive grains protruding from a resin layer on the wire is about 70% or less of the average grain size in combination with the rest of the claimed limitations set forth in the independent claims.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
3. The closest art of record is Kondo et al (6,837,778), which is owned by the same assignee as the current application but fails to disclose that the thickness deviation percentage of a resin layer with respect to the wire is about 40% or that the average height of abrasive grains protruding from a resin layer on the wire is about 70% or less of the average grain size
